

# Clinicians Connections

*Clinicians Connections aims to increase a practitioner's knowledge of BPD and the five levels of dysregulation which can be experienced by individuals with BPD. The programme will enable mental health practitioners to develop a skillset for working effectively with dysregulated clients and through reflective practice and peer support, decrease their stress levels.*

*This is a new course and the first time to be conducted in Australia. It will be presented by international experts in the field of emotional dysregulation and high risk self harm behaviours, Prof. Daniel Flynn and Dr Mary Kells from the United Kingdom*

**IN PARTNERSHIP WITH**

Prof. Daniel Flynn

Dr Mary Kells
