

Family Connections Leader Training

Family Connections Leader Training will be held in February 2020. International guests presenters Prof. Daniel Flynn and Dr Mary Kells will be conducting the two day family connections leader training.

Family Connections is an evidence-based program for families and friends of people with borderline personality disorder that provides peer support, psycho-education and skills anchored in dialectical behaviour therapy (DBT).

The Family Connections Leader Training is to train clinicians and carer-peers with the view to facilitate groups for family/friends of people with Borderline Personality Disorder, BPD traits or Emotional Dysregulation. The two days of training will enable participants to join family connections as a leader of the internationally renowned Family Connections program.

This training is only for those who wish to run NEABPD Australia's Family Connections groups as volunteer leaders and can commit to running a group within three months post training.

PROUDLY SUPPORTED BY

Prof. Daniel Flynn

Dr Mary Kells
